Step 2 of 4 (a) The number is 3000. To express the given number in scientific notation, move the decimal point an appropriate number of places to the left to determine the positive power of ten. The result should be a number between 1 and 10 times a power of ten. Thus, the scientific notation of the number is .

But, what is electricity really? Let's start with three very basic concepts of electricity: namely, electric charge, electric current, and electric circuit. Electric charge refers to a fundamental property of matter that even physicists don't totally understand. Suffice it to say that two of the tiny particles that make up atoms — protons and electrons — are the bearers of electric charge.
